Tufts Rocketry

Dear Potential Sponsors,

On behalf of the Tufts SEDS Rocketry Team, we are excited to present this sponsorship proposal for your consideration! Tufts Rocketry is a passionate and highly motivated team of Tufts University student engineers and rocketeers aiming to expand our team rocket program and compete in the International Rocket Engineering Competition. We are inviting forward-looking organizations like yours to support our journey towards engineering and rocketry excellence and our efforts to develop the aerospace community at Tufts.

Sponsorship with Tufts Rocketry will give your organization a unique opportunity to reach a talented pool of creative problem solvers, innovators, and well-rounded engineers. We hope to find a sponsorship plan that fits your company's goals and budget, and we look forward to working with you.

Sincerely,

Sean Doherty and **Lily Lai**

Team Leads, Tufts Rocketry

Tufts Rocketry

Team Overview

Tufts SEDS Rocketry is a student-led engineering team dedicated to the design, manufacturing, testing, and launch of high-power rockets. Students from diverse academic backgrounds collaborate to solve multidisciplinary, real-world engineering challenges while gaining hands-on experience through design reviews, testing, personal certifications, and national competition. Our emphasis on technical rigor, collaboration, and student ownership prepares members for careers in aerospace and engineering while our STEM outreach shares our passion for space with the broader community.

Team Highlights

- 123 Launches
- 40+ Members
- 56 Certifications

Tufts Rocketry

IREC 2026

- 8th Overall
- 5th in Category
- 7th Flight Score

International Rocket Engineering Competition

The International Rocket Engineering Competition (IREC) is the world's largest intercollegiate rocketry competition. Each year, more than 140 teams go to Midland, TX to launch

Throughout the year, teams complete progress updates, safety and design reviews, and a final project technical report, all in support of a rigorous design, engineering, and testing process.

Tufts competed for the first time ever in 2024 in the 10,000-ft commercial solid motor category. In 2026, we improved our design and implemented air brakes to come within 0.85% of our target apogee and place top ten overall.

Tufts Rocketry

Team Rocket Milestones

DECEMBER
- Preliminary Design Review
- First Progress Update

FEBRUARY
- Second Progress Update

MARCH
- Test Flight

APRIL
- Project Technical Report
- Flight Readiness Review

JUNE
- Competition

Tufts Rocketry

Team Rocket Budget FY27

*Competition budget estimates are based on the IREC 2026 pricing and are subject to change.

Tufts Rocketry

Sponsorship Packages

Platinum Sponsor . . . . . $10,000+

- Large logo on rocket, website, and select team apparel
- Opportunities for team engagement and product demos
- Gold Benefits

Gold Sponsor . . . . . $5,000+

- Small logo on rocket
- Social media coverage
- Silver Benefits

Silver Sponsor . . . . . $1,000+

- Small logo on website
- Access to team resume book
- Bronze Benefits

Bronze Sponsor . . . . . $100+

- Recognition in team presentations
- Invitation to team events

Custom Sponsorship Packages:

We understand that the above options may not fully satisfy your objectives, and we are open to developing sponsorship packages tailored specifically to your needs.
